- Operations & Maintenance
- Unexploded Ordnance
- Product Solutions
- Sourcing & Procurement
- Logistics & Warehouse

# EXPERIENCE

## → State of Texas Integrated Eligibility Program

The Integrated Eligibility (IE) program provided a comprehensive process and applications to integrated the application, case review and determination, and payments for the State of Texas' Health & Human Services programs. A single application and process was created for Medicaid, Medicare, Child Support, WIC, and all HHS program. Multiple channels were created to streamline enrollment providing Citizens with their choice including Phone, Web, Mail, and Fax and in-office interviews. CGS participated in the design, construction and Testing of the applications supporting this innovative approach to eligibility enrollment and determination.

## → Affordable Care Act (ACA)

State Health Exchanges - In 2013, the ACA was introduced by the U.S. Legislature mandating that each U.S. citizen meeting certain criteria would seek and obtain public health coverage or face penalties. Our client and the prime contractor, Accenture, developed a product for use by individual states to update or replace their existing Benefits Management System for federal and state benefits including Medicaid, SNAP, and TANF. The system managed online application intake and ongoing management including renewals of cases for individuals with public benefits. This enterprise web application would handle multiple concurrent users across several locations, and would comply with the requirements of the ACA. CGS implemented comprehensive software development and maintenance efforts to adapt the client platform and State specific customizations for three state systems (Oregon, Washington, Idaho) in compliance with their state laws and regulations.

## → U.S. Health & Human Services, Indian Health Service

CGS provided a team of Document/Image Management personnel to assemble, scan, perform quality assessments and return Indian Health Service records. The IHS records were old and required significant care in handling and scanning. CGS performed the function flawlessly and continues periodically to support the IHS in this ongoing need.

## → State of California

California Child Support Automation System - Child Support Enforcement (CCSAS-CSE) - A statewide Child Support automation system integrating 49 child support agencies for all 58 counties to manage the child support functions, including payments. CGS supported the development and system testing of the financials, reports, and forms portions of the custom application. CGS participated in the first successful Go Live deployment in Orange County.

## → City of Heppner, Oregon Infrastructure Support

This project focused on upgrading this Eastern Oregon Municipality's infrastructure which is used to support their city-wide services, while also increasing network security and increasing inter-office connectivity. CGS designed the upgrade in conjunction with City of Heppner employees and purchased and installed the equipment and provide training to Users. CGS is providing ongoing remote monitoring services, including Level 1 and Level 2 Service Desk support, as well as on-site Deskside Support as required.

**SQUARE FOOTAGE - 41,000**  
**NUMBER OF SEATS - 350+/-**
